3Y0J Bouvet Island

Ham Radio Network presents Adrian, KO8SCA, talking about the upcoming 3Y0J DXpedition to Bouvet Island in January 2023.

VK9NT Norfolk Island –update

FT8 Guidance. VK9NT operates Fox & Hound Mode 10kHz up from the nominal FT8 frequency on each band. e.g. 14074 up to 14084.

Also, our bags arrived. This afternoon we have setup the beverage receiving antenna for 160m. We will try 160 from our SR from local 21 April (UTC + 11). We also have our doublet antenna up about 27m which we know works well on all bands from 80-10m.

Watch for us on the clusters and spin that dial. We'll ramp up operations now and see if we can make up for lost time.

TX5N Austral Islands –update

All antennas are up. Some WX yesterday took down 2 VDAs, repaired this morning. Windy, rain, high temperatures and high humidity.

We're doing about 4,000 Qs a day. There was a log upload with about 4,000 Qs. Planning 160 tonight.

Internet on the island is erratic and very slow. We are having difficulty uploading anything more than short emails. Our satellite service provider has a problem on their end, with no resolution in sight.

JW, SVALBARD -update

Yesterday, a case with our bandpass filters got lost at Tromsø airport. We were hoping to pick them up today, but we were told to come back tomorrow. So, unfortunately, only 17-20-40-80m until then. But still: 4000+ QSO's in the log, and going strong.
